

POHJANMAAN TEOLLISUUS 2019

SEINÄJOKI

New! The top industrial event in Ostrobothnia

WED 15th May 2019 9.00–17.00

SEINÄJOKI
AREENA

Pohjanmaan Teollisuus

(Ostrobothnian Industry) is a new all-day event that **gathers the top experts of industry and services** in the region to take part of the latest in the business. There are many innovative businesses in Ostrobothnia that have a lot to offer both nationally and internationally. In particular, the technology, metal and workshop industries hold a strong position in Ostrobothnia. The export rate of the region's technology industry – nearly 6 billion euros a year – also speaks for itself. One third of company employees in Ostrobothnia is industrial workers, the share of which is much larger than the national average.

The delivery chains are changing rapidly. Globalisation and digitalisation have brought challenges and also created new opportunities. Robotics, IoT, artificial intelligence and 3D technology offer completely new ways of working. In order to ensure competitiveness and operational efficiency, modern technology, fresh ideas and the right partners are required.

Pohjanmaan Teollisuus presents the industrial knowhow in our region in a nutshell. At the event, contract manufacturers, sub-suppliers and equipment manufacturers are on the search for partners and new customers. Here you will also meet experts in management, production, acquisition and engineering, make new contacts, and lay the foundation for sustainable co-operations.

Book your stand at this intense and high-demand event now!
